- 32-75" | 81,3-190,5 cm
- 100x100 - 800x400 mm
- 0-45 kg | 0-99,2 lbs

Installation made easy

Neomounts complete easy install wall mount range with fixed, tiltable and full motion wall mounts is specifically designed to give you the best experience possible; not only when using the mount, but also when installing it.

Magnetic pull & release

Several mounts feature the nifty magnetic pull & release system, which allows you to attach the screen in a wink of an eye and secure the screen in a safe and solid manner. Following installation, the pull & release straps can be easily hidden behind the screen by clicking the magnet to the mount. The models which do not have the magnetic pull & release system are equipped with an easy-release VESA system, to quickly (de-)attach the VESA to the mount.

Spirit level

All wall mounts, with the exception of the WL40 series, include a spirit level to ensure easy installation. The Neomounts 550-models feature an integrated spirit level, while the 850-models have a separate magnetic spirit level, which can also be used for other purposes, in addition to installing the mount.

Fixing template

All wall mounts in the 850 series have a fixing template included in the packaging, to make installation of the mount even easier.

Level adjustment

Various mounts offer height and level adjustment, after installation to the wall. This guarantees the perfect installation of your wall mount.

Lockable

It is possible to lock various models, using the special anti-theft screw which is included with the wallmount, or with a padlock (not included).

Efficiently packaged

The wall mounts are clearly packaged and all components are neatly organised, to make installation as simple and effortless as possible.

The packaging of the Neomounts 850-models include a special bolt box, making the installation process even more efficient.
